Hays,

The Red and Bonita mine is shown in the Upper Animas-2012 PDF as CC03 D in the sample locations. The sketch map (Gold King AOC figure) shows the road orientations but no numbers; I believe the road to R n B is Cnty Rd 52. The aerial shot shows the red colored site, which is the Red and Bonita, below the Gold King Mine. You start up the same way from "Gladstone" (the right side of Cement Ck as you headed up) to go to both RnB and Gold King, but then keep going straight to R n B vs the right to Gold King.

Also, I just talked to Matt and he plans to get part way tonight. So he'll be onsite tomorrow late morning probably.

Thanks,

Steve
